

New Arrivals

SKIRTS

A beautiful line of novelty skirts just came in. We desire to show these to you in all the new styles, such as awning stripes, pointed tails, new silver chime, white serge and many others.

BATHING SUITS

The time is near at hand when you will need a them in navy blue with white and red trimming, made from good Jersey—prices... \$3.25 and \$2.75.

SILK SUITS

A handsome assortment of these will be found in materials as follows: Poplin, Gros de londre and Taffetas, sizes 40, 42 and 44.

WASH SKIRTS

In the new Cretonne, Bedford Cord and Pique effects.

TAFFETA

We just received a line of handsome lustrous Taffetas, something out of the ordinary, 36 inches wide, soft, with a mellow finish; regular \$1.75 grade, now \$1.49.

See them.

NOVELTY SILKS

In stripes, two toned, as well as combination stripes for skirts and suits. Prices ranging from \$1.25 up to \$2.45, 36 inches wide.

WHITE DRESS

A line of the most beautiful and dainty white dress material is now on special sale, including Batistes, Crepes, Organdies, Mulls, Swiss, Voiles and many other sheer fabrics. See these, also trimmings to go with them.

WHITE SILK HOSE

Just came in this morning

FANCY VOILES

38 and 40 inches wide, 25c and 30c kind; special for a few days... 19c.

CHILDREN'S

A complete line of dainty colored Dresses just came in; sizes from 4 to 12 years. See our windows.

The Store of Quality

COMMENCEMENT DAY
OF SMITHSONIAN
COLLEGE

The first of the annual series of commencement exercises of Ogden educational institutions was held last night, when 92 graduates of the Smithsonian Business college were presented with diplomas. The exercises were held in the First Methodist church, which was crowded to its capacity, with relatives and friends of the graduates and alumni of the pioneer commercial school. A program of much interest was carried out, the speakers being Hon. Fred J. Kiesel, A. P. Bigelow, Mrs. Hyrum Smith and President J. A. Smith of the college.

Miss Vera Frey presided at the organ and played a march as the big class of future elements in the commercial life of Ogden and other communities filled into the large chapel and took their places on the rostrum. The first number on the program was a vocal duet by Hannah Johnson and Amy Porter and the invocation by Rev. B. H. Leesman followed. Miss Muriel Layne and sister next rendered a vocal duet and this was followed with a selection by the Smithsonian male quartet, composed of Jay A. Smith, Ed Greenwell, Gerard Klomp and Ed O. Peterson, an organization which has become almost an institution in connection with Smithsonian college commencements.

Miss Nona Maycock, who was programmed as "O. U. Guess," put some humor into the exercises with a talk, cleverly prepared for the benefit of her classmates and replete with incidents in their term at the school, and all of pleasant memory.

Another selection by the quartette preceded the talk, "Reminiscences of Twenty-five years," by Prof. J. A. Smith, founder and president of the college. This, in a measure, was a history of commercial progress in Ogden and other communities in Utah and the surrounding states, determined by the utilization of the graduates of the Smithsonian college as a barometer. In the quarter of a century since the founding of the school, President Smith stated, 650 students had received instruction there, 1,111 of whom had received diplomas. Virtually all of the graduates and many of the other students have been swallowed up into the commercial business and railroad life of Ogden, Utah and other places in that length of time, having received employment in the different branches of commerce in almost every case, immediately after and sometimes before, their graduation.

Among the alumnae who have risen to special prominence through their clerical training, President Smith named the following: Rob. Harris, Fred J. Kiesel, Jr., Eugene Corey, D. D. Smith, Dr. C. C. Snyder, Chas. E. Littlefield, Mrs. W. E. Moore, C. N. Carstensen, Frank Hotelling, Jay A. Smith, Dr. R. Wheelwright, Thomas B. Furr, A. K. Kerr, Walter G. Webb, Miss Eva C. Erb, Miss N. A. Williams, Dr. Pidecock, Dr. Crawshaw, Fred G. Taylor, Chas. Empey, Miss Annis Brown, Guy Clark, V. P. Cain, Will Garr, A. L. Wilson, A. M. Tribe, Cassie Moore, Rose Pennington, J. W. Stevens, Jesse Moore, Al Steed, C. A. McCarthy, A. H. Pratt, Anna Hansen, Pearl Cook, Ethel Stratford, Ada Wallin, Judge Geo. A. Barker, Jim Doon, Chas. Maguire, Frank Clayton, Mrs. T. C. Gordon, Mrs. Nellis Fletcher, A. B. Peterson, Will F. Rudiger, Norma Wold, E. A. Stevenson, Dr. Mark Brown, Dr. C. T. Smith, H. P. Randall, W. J. Stephens, Zinn, Edith Reid, John G. Heywood, J. B. Randall, W. H. Draney, Chas. Meighan, Dr. Wardleigh, W. A. Kerr, Lorin Boyle, E. E. Wattis, Ray Wattis, Jas. B. White, Mrs. Alice Collins, Mabel Jensen, R. B. Porter, J. H. Jenkins, Wm. Christopher.

In concluding his remarks, Prof. Smith expressed his deep appreciation for the support given him by the business men of Ogden in the early establishment of his school and in its development.

A. P. Bigelow's Address.

A. P. Bigelow delivered the first address to the class last night, his subject being "The Woman in the Office." In part, he said:

"I suppose the reason I have been asked to talk to you briefly on the subject of 'The Woman in the Office' is that I have spent almost my lifetime in an office.

"During that time there has been a number of inventions either made or perfected, which have revolutionized the method of handling business.

"Among them are, the typewriter, stenography, the various copying and filing systems, the telephone and the adding machine and with them Woman has come into the office, with her nimble fingers and quick perception, and has almost completely taken over certain parts of the work.

"You may not realize that 35 years ago hardly a woman was working in an office, while now you can scarcely find an office where there is not a woman working.

"This change seems to have come about naturally, she has come along with the various devices which she handles so deftly, and with the marvelous growth in the volume of business.

"She is industrious, patient and honest, and when her mind is trained to business she has as large a grasp on the big points as her stronger brother and an insight which makes her judgment almost unfailing.

"It was formerly thought that a woman's place was in the home, that business was hard, and by contact with it she lost those womanly qualities for which she is most admired. But it has been shown that rather than she brought into the office a feminine touch, a refining influence, which has fitted in most timely with the recent strong movement toward higher standard in politics, business and individual life.

"All labor is honorable, if earnestly and honestly performed, but it was not always so regarded.

"It has taken long ages to break down the barrier between classes, and it remained for American freedom to emancipate the laborer, and now a woman's employment in an office is considered an honorable and desirable occupation.

"While I have spoken a word of encouragement to those of you who are going into the office, I cannot help calling to your attention the fact that

the employer is constantly sending away those who have shown their incapacity to further the interests of the business, and others are taken on—and this sorting continues, forever out of the incompetent and unworthy go.

"Take the same interest in the business that you would if it were your own.

"In the world of travel there has grown up a forceful phrase 'Safety First', but in the world of business there is an equally strong and expressive word, 'Efficiency.' It is the crying need of business and in that quality of efficiency are wrapped up industry, ability and loyalty. I place loyalty above the others."

Fred J. Kiesel's Address.

"The Young Man in Business" was the subject discussed by Hon. Fred J. Kiesel. The talk was brief but characteristic, the retired merchant drawing upon his full fund of commercial experience in advising his young hearers as to how they too could attain success. The principal thoughts expressed in the advice given was that a young man should aim high and be persistent in his endeavors to reach the goal. Digressing, a moment, Mr. Kiesel told of his first meeting with Professor Smith shortly after the latter came to Ogden. He was deeply impressed with the professor's personality, he said, and when the latter asked his support in establishing and building up a commercial school, he gave it willingly, believing that it would be well to keep such a man in the community.

Mrs. Hyrum Smith made the closing talk to the class, her subject being "The Girl in the Home With Mother." The talk was an expression of excellent thoughts and the lesson that "woman makes the home" was forcefully brought out.

The diplomas were presented to the graduates by President Smith and members of the college faculty and Miss Frey played a beautiful organ postlude as the crowd departed from the chapel.

Graduates of School.

The list of graduates follows: Commercial—Hon. R. A. Pierce, Veach C. Grow, Otto M. Hansen, Thomas Hunter, George F. Jones, Verne J. Myers, John H. Myers, Arthur D. Stallings, Jesse L. Stoker, Stanley G. Smith, O. D. Wheelwright, Henry C. Williams, Ronald E. West, Dom J. Coletti, Christina Erickson, Andrew Hansen, Henry K. Hoff, C. W. Higley, E. Llewellyn Keller, T. May Rife, Thomas W. Todd, Corstian J. Vieser, Helen I. Wilhelm.

Bookkeeping—Dewey Baxter, Harold Gidley, Joseph Hunter, Lionel Cardon, Henry Grondell, Vernon Poulson, Harry R. Shinnery, James Fades, C. F. Stanley, Fowers, C. F. Mrs. C. E. Baker, C. F.

Stenographic—Edna P. Bateman, Emma E. Chausse, Rosezella Dalton, Fred W. Dalton, Bernice M. Fuller, Elsie I. Frazier, Mary E. Green, Nora C. Keener, Vinnie Laurensen, Muriel W. Layne, Walter E. McPhie, Eva I. Phillips, Winifred J. Rouse, Ruth M. Rosencrans, Fuchsia E. Stoker, Frances E. Stoddard, Evelyn Swanson, Cecile Wadsworth, Virga B. Webster, Emily Allard-Post, Benjamin G. Snyder, Margaret H. Foley, Clifton Greenwell, Nellie M. Hunt, Hannah E. Johnson, Naomi I. Kimrey, Richard L. Lawton, Rose E. Lindstrom, Blanche Moore, Kathryn Murray, Leona Payne, Amy H. Porter, Glen F. Stone, Irma A. Tracy, Anna T. Wallace, Stella Winfrey.

Stenographic Class—"July"—L. A. Ashby, Albert Bell, Joseph H. Bell, Errol A. Collins, Mabel C. Cowels, Edna A. Cook, Gertrude M. Drews, Laura Keyser, Alma L. Hansen, Irene K. Helm, Elsie C. Hill, Evelyn A. Hoag, Lucile A. Johnson, Henri Nalsbitt, Lois J. Owens, Kenneth Phillips, Florence Pringle, Margaret E. Spidel, Amelia Spahn, Earl Taylor, Helen M. Tracy, T. Fay Tribe, Myrtle West, Genevieve McGlone.

1917 Stenographic Class—H. G. Amerson, E. R. Applegate, Dorothy Browning, W. H. Mohler, Gertrude Cook, Viola Carr, Alden Conn, Alberta Falseroff, Phronie Hodson, Ida Hodson, Madelyn Harris, Elizabeth Halsted, Alma B. Hamilton, Anna M. Jamison, Carlisle Lichtenberg, Mabel E. Martin, Nona Maycock, Eng. Waynard Murphy, Ethel McLauren, Mary Olson, Mattie O'Donnell, Geneva Park, Cletus Richey, Edna Towne, Ellice Wright.

"When I see a man standing erect and bringing his heels together with a click, I know that man has been in the army," says a former Congressman.

Not necessarily. He may merely have been well trained by his wife.

MAYOR AND DOCTOR TO
TAKE PART IN
EXERCISES

A program of more than ordinary interest will be presented at the sacrament meeting in the Third ward chapel Sunday night, when Dr. A. S. Condon will read a number of his poems and Mayor A. R. Heywood will deliver an address. Special music will be furnished for the occasion by Prof. Hammer, Charles Ramey and Miss Myrtle Kline. The meeting will begin at 7 p. m. and the program will be as follows:

Song, "The Star Spangled Banner," congregation.

Invocation.

Song, "Jerusalem," Miss Kline.

Introductory address, Mayor Heywood.

Song, "Invictus," by Hammer.

Readings from Dr. Condon's poems read by the author.

Viz., "The Pioneers," etc.

Song, "Evening Star," Mr. Hammer.

Readings.

Song, "The Sword of Bunkerhill," Mr. Ramey.

Readings.

Song, "Mother McCreary," Mr. Hammer.

Readings.

Song, "Violent," Mr. Hammer.

Singing by the audience "Praise God From Whom All Blessings Flow."

Benediction.

Among the clerks in the office of one of the Cabinet members at Washington is a very dull young man, who seems never to be able to do anything without making mistakes.

"Why do you keep that fellow?"

"He is one of the most useful clerks I have. Before I issue an order, I always have him read it. If he can tell what it means, I am sure that there can be no chance that anyone will misunderstand it."

"The cook wants to borrow something from the library. Shall I let her have it?"

"Certainly. If she gets interested in a story she may stay until she finishes it. Give her one of those long English novels in four volumes."

Nowadays the only occasion on which it is incorrect for a girl to go out with a man unchaperoned is when she has not been asked.

depth of 30,930 feet. The greatest yet found, however, is the Swire deep off Mindanao of the Philippines, this being 32,089 feet, or 3089 feet deeper than Mount Everest of the Himalayas, is high. However one gains an idea of the rarity of such abyssal regions from the fact that of the 9750 soundings that have been made and reported in water over 1000 fathoms in depth, only seventeen were greater than 4000 and only three exceeded 5000 fathoms in depth. The greatest recorded depth of the ocean is only 409 feet more than six miles—Scientific Monthly.

Information given the police was to the effect that the girl was crossing the street when the accident occurred.

"I'm sorry, mum, but I've got to leave you. I've taken another place."

"Another place? Why, Mary, is it a matter of money?"

"No, mum, the new folks are going to pay me just the same wages as you."

"Are they offering you easier work?"

"No, mum, the work is just about the same."

"Then why are you leaving us for them?"

"Well, you see, mum, they have a 1916 model auto."

THE FATHOMED DEPTHS OF THE OCEAN

The deepest regions of the ocean are commonly close to the shore and are believed to have been caused by the crumbling inward of the earth's crust due to the pressure of the near land. Such is the "Tuscarora deep," a long, narrow trough which extends northward from Japan along the coast of Asia, its bottom being more than 27,600 feet below the general level of the ocean's floor. An even more profound abyss is the Aldrich deep, close to the Tongan and Kermadec Islands, which sinks to a
